Solarisation of Agricultural Water Pumps in Western India Dr. S.S. Kalamkar, Dr. Sonal Bhatt, Dr. Hemant Sharma, 2020-02-17 This book is outcome of the research report on “Solarisation of Agricultural Water Pumps in Western India”. The book is structured in five chapters highlighting important issues related to large scale adoption of solar irrigation pumps, its economic feasibility and problems in adoption of same in the states of Gujarat and Rajasthan. The book provides useful insights to understand the socio-economic profile of adopter households and constraints faced by them. This book would be helpful to adopt the suitable measures and policies for better and speedy adoption of solar pump and thus help in increasing income of the farmers.

A STUDY ON FINANCIAL ANALYSIS OF AGRICULTURAL PRODUCE MARKET COMMITTEE UNJHA, MEHSANA, GUJARAT KIRTAN P. RAVAL,

Eradicating Energy Poverty Manashvi Kumar Singh, 2022-03-11 Decentralized energy systems paradigm calls for – a) evidence-based policy for local resource assessment, and b) context-specific energy needs assessment for- overcoming ‘barriers’ to decentralized energy systems in India. The pristine bedrock of the book comprises theoretical underpinnings of empiricism, behaviourism and realism. These concepts find their extension through inter-disciplinarity, and the mixed methods approach adopted for understanding spaces and cultures of energy consumption. Demand side management in energy sector entails-migration from a target-based (TB) approach towards an evidence-based (EB) approach for designing context-based policies in respect of energy demand, and an associated policy shift from a techno-economic regime towards a socio-technical regime embedded in ‘appropriate’ contexts. “Prosumerism holds the key to democratization of energy systems in India.”

Agriculture Schemes Dr. Sanjeev Atrey, Sachchidanand Upadhyay, Amit Yadav, 2019-09-20 Government of India is giving more priority for welfare of the farmers. In this regard it is implementing several farmers welfare schemes to revitalize agriculture sector and to improve their economic conditions. Therefore, the government has rolled out new initiatives, schemes, programmes and plans to benefit all the farmers. Doubling of farmer's income till 2022, requires annual growth of 10.41 per cent in farmers income. This book mainly focuses on government schemes launched by Ministry of Agriculture & Farmers Welfare. The main objectives of the scheme are to meet the short term credit requirements for cultivation of crops, produce marketing loan, consumption requirements of farmer household, working capital for maintenance of farm assets and activities allied to agriculture like dairy animals, Fisheries etc.

TERI Energy & Environment Data Diary and Yearbook (TEDDY) 2020/21 TERI, TERI Energy & Environment Data Diary and Yearbook (TEDDY) is an annual publication brought out by TERI since 1986. It is the only comprehensive energy and environment yearbook in India that provides updated information on the energy supply sectors (coal and lignite,

petroleum and natural gas, power, and renewable energy sources), energy demand sectors (agriculture, industry, transport, household, buildings), and environment (local and global). Recent changes in the energy sector and environment are depicted with the help of graphs, figures, maps, and tables. The publication also reviews government policies associated with energy and environment. TEDDY 2020/21 gives an account of India's commercial energy balances, extensively covering energy flows within different sectors of the economy and how they have been changing over time. These energy balances and conversion factors are a valuable reference for researchers, scholars, and organizations engaged in energy and related sectors. Contents of the book are organized into three sections—Energy Supply, Energy Demand, and Local and Global Environment.

Interlinkage of SDGs with energy and environment also forms the subject matter of TEDDY 2020/21. The thirty-sixth edition continues to remain less prose intensive with inclusion of more data, represented with the help of infographics, thus making the publication an authentic and interesting read. Key Features: • Provides a review of government policies, programmes and initiatives that have implications for the petroleum and natural gas sector and the Indian economy • New chapters on Air Pollution, Solid Waste Management, Water Resource Management, and Land and Forest Resource Management • Exhaustive data from energy supply, energy demand, and local and global environment sectors Contents: Energy and environment: an overview Energy supply: Coal and lignite • Petroleum and natural gas • Power • Renewable energy Energy demand: Agriculture • Industry • Transport • Household energy • Buildings Local and global environment: Air quality and pollution • Solid waste management • Water resource management • Land and forest resource management • Climate change

Shedding Light on Electricity Utilities in the Middle East and North Africa Daniel Camos,Robert Bacon,Antonio Estache,Mohamad Mahgoub Hamid,2017-12-04 The electricity sector in the Middle East and North Africa (MENA) is in the grip of an apparent paradox. The region holds the world's largest oil and gas reserves and has been able to universalize access to electricity in most economies, but it may not be able to make the investments required to meet the future power needs of its fast-growing populations. The annual investments to keep pace with the demand for electricity have been estimated at about 3 percent of the region's projected GDP. In most of the region's economies, however, financial constraints limit the ability to make those investments. The power sector needs to find its own financing sources—and quickly. *Shedding Light on Electricity Utilities in the Middle East and North Africa* provides quantitative evidence on how better utility management; sustainable pricing; and selective, context-specific reforms would free enough resources to make the needed investments and lower the operating costs of the sector. The solution involves cutting costs and raising revenues through well-targeted and well-identified improvements. These improvements would generate more financing than the sector's investment needs. The report provides detailed evidence of the size of the potential gain in each of the 14 MENA economies covered. The analysis is based on the MENA Electricity Database, a new dataset covering 67 electricity utilities, as well as a sample of utilities in comparable economies from other regions. The authors hope that their benchmarking efforts will provide a regional- and utility-level frame of reference for sector performance in the region. The book will be of interest to managers of electricity utilities, regulators, policy makers, and other stakeholders concerned with the performance of utilities in the region.

Governance of Indian State Power Utilities Sheoli Pargal, Kristy Mayer, 2014-10-17 This review of the Indian power sector at the state level finds that priority should be given to implementing a robust regulatory framework and governance practices to ensure better utility performance.
